What are Complete Streets?

Complete streets are roadways planned, designed and constructed to accommodate safe access for all users. On these streets, pedestrians, bicyclists, motorists and transit riders of all ages and abilities are able to safely move along and across streets which may include sidewalks, crosswalks, and bike lanes.

What do Complete Streets Policies do?

Complete streets policies direct transportation planners and engineers to consistently design with all users in mind including: drivers, public transportation vehicles and riders, pedestrians, and bicyclists as well as older people, children, and people with disabilities.

What do complete streets look like???

There is no cookie-cutter answer for what complete streets look like. The common features for a complete streets include:

- Sidewalks
- Bike Lanes
- Wide Shoulders
- Plenty of Crossing Opportunities
- Sidewalk Bulb-Outs
- Refuge Medians
- Bus Shelters and Crossing
- Special Bus Lanes
- Raised Crosswalks
- Audible Pedestrian Signals

Why do we need Complete Streets?

- Helps to foster strong communities
- Assists in increasing physical activity levels of residents
- Provides a mode of transportation for those individuals who are unable to drive
- Improves pedestrian and bicycle safety
- Associated economic impacts
 - Positive: businesses will locate where there are paths to their establishment
- Increases physical activity levels
- Improves the environment so more students can safely walk and bike to school daily
